Commencing at 5.30pm

Meet staff, students & discover graduate study options

The Melbourne School of Population and Global Health offers a unique and exciting range of postgraduate professional education and research training opportunities. The Melbourne School of Population and Global Health has expertise in core public health disciplines such as epidemiology and biostatistics, public health leadership and management, social sciences, ethics and medical humanities, global and indigenous health. This breadth sets the School apart in public health training and provides our students with key advantages. The School has a wonderful diversity of students and focuses on collaborative learning approaches and vocational outcomes.
